

HOW TO FOLD YOUR *indEx* ELEPHANT

LIMITED
ISSUE
ONLY 100
AVAILABLE

HOW DO YOU HOLD YOUR PENCILS?
INDEX MAY HAVE THE ANSWER...

If you are lucky enough to have an indEx Elephant, then you need to know how to "bend it" like a professionally skilled press breaker...

1

So you've got one! Great and thanks for your interest!

2

Fold the two side flaps down thus.

3

Fold in the back side and tail.

4

Your Elephant needs some feet! So fold in the flaps underneath and to the back.

5

Fold up the neck piece, the ears and nose are down to your preference.

6

That's how we think it should look, but as we say at indEx - no compromise - it's your Elephant...

**BONUS
TIP**

Point your indEx Elephant to your door. Apparently that's lucky. Well it must be as you have found indEx!

Why? It shows our expertise, knowledge, diversity and above all quality.

Your indEx Elephant will hold your 2 pencils for decades!

We laser a flat sheet panel of stainless steel to get the "cut out" but we can also laser a pin point cut line which makes it easy for bending.

INDUSTRIAL OR EX WE HAVE THE SOLUTION.
